The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kawai et al(6197414) alone.

The cited reference teaches the basic claimed invention including a fiber board made by bonding kenaf fibers with a thermosetting adhesive agent, resulting in the fiber board having a density of 600-900 kg/m cube and wherein the fibers have an average diameter in the range of 10-300 mm and an average length of 10-200 mm – col 3, lines 45-50; col 4, lines 1-46; col 5, lines 22-43; see entire reference. Concerning claims 7 and 2, the cited reference teaches the claimed molecular weight and and claimed limitations in col 11, lines 54-56; col 12, lines 64-67. Concerning claim 8, the cited reference teaches the claimed resistance in col 11, lines 61-66. Concerning claim 10, the cited reference teaches the claimed limitations in col 5, lines 64-66. Concerning claim 4, the reference teaches the claimed limitations in col 4, lines 27-44. concerning claim 5, the cited reference teaches the dimensions as claimed in col 5, lines 34-39; see entire reference. Concerning claims 3 and 9, it is submitted that such claimed pH, as claimed for the adhesive, would be inherent for that taught in the cited reference as it

appears that the reference teaches identical adhesive. Likewise, the claimed bending strength would also be inherent for reasons stated above.
